CLINICAL DATA MANAGEMENT & ANALYSIS

OVERVIEW

The customer is a Swiss based multinational company, and one of the largest pharmaceutical companies by both market capitalization and sales having 50 billion annual turn over.

CHALLENGES

Objective was to significantly abbreviate time to complete oncological trial (Solid tumours), including rapidly recognizing when a trial should to be terminated. In the meantime, management needed to constantly comply with regulatory investigation from Federal Drug Administration and utilize it to proactively screen and oversee remarkable trial event.

Fragmented data over different heritage frameworks, and this deferred the ability to make business decisions

Extensive Data manipulation

Incompatible legacy system impended data integration standardization
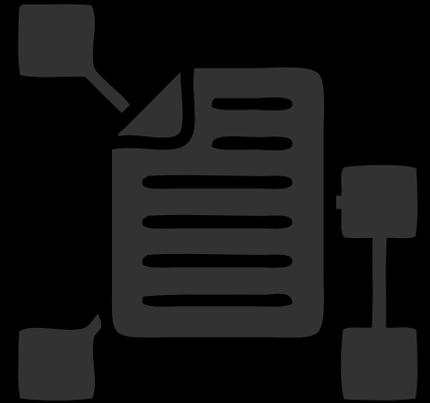

Lack of a unified data view for all users across data sets

SOLUTION

ACL Digital launched CDM Analytics to ensure tight alignment of the latest technologies with key clinical processes. Technology implemented include:

1. Electronic data capture (EDC)

2. Clinical data management systems (CDMS)

3. Interactive voice or web response technologies (IVRS/IWRS)

4. Clinical trial management systems (CTMS)

5. Clinical drug supplies management systems (DSMS)

ACL's CDM Data Analytics breaks down the silos of information which have limited access of integrated system and unlock a holistic view of real time trial data.

OUTCOMES

> Real time insights into Trial operations

> Stronger Financial Management

> Efficient Regulatory process

> Increased Staff efficiency and management

ACL Digital is a design-led Digital Experience, Product Innovation, Engineering and Enterprise IT offerings leader. From strategy, to design, implementation and management we help accelerate innovation and transform businesses. ACL Digital is a part of ALTEN group, a leader in technology consulting and engineering services.
