

HealthIntellect

Drive convergence, accelerate business decisions and transform patient outcomes

ACL Digital's HealthIntellect solution accumulates health data from numerous sources, including electronic health records (EHRs), medical imaging, genome sequencing, payor records, pharmaceutical research, wearables, and medical devices, to name a few; it leverages data and total experience at the core, it provides operational decision support and delivers value based actionable intelligence.

ACL Digital HealthIntellect acquires its intelligence from data intellect and presents it through insights intellect. The solution aims to cover the entire patient Journey focusing on revenue cycle management leveraging data collected at various touch points from clinical, non-clinical, and administrative applications.

HealthIntellect turns care data into actionable intelligence

Data-driven decisions combined with intelligent technologies promote value-based care.

Why HealthIntellect?

1 Consolidates insights of day-to-day administrative and clinical activities involving patient-payer and payer-provider.

2 Enhance patient experience at every touch point through journey analysis using patient reported data

3 Ready to use visualization and KPIs catalog to cut down time(~30%) and cost for visualization process use case preparation.

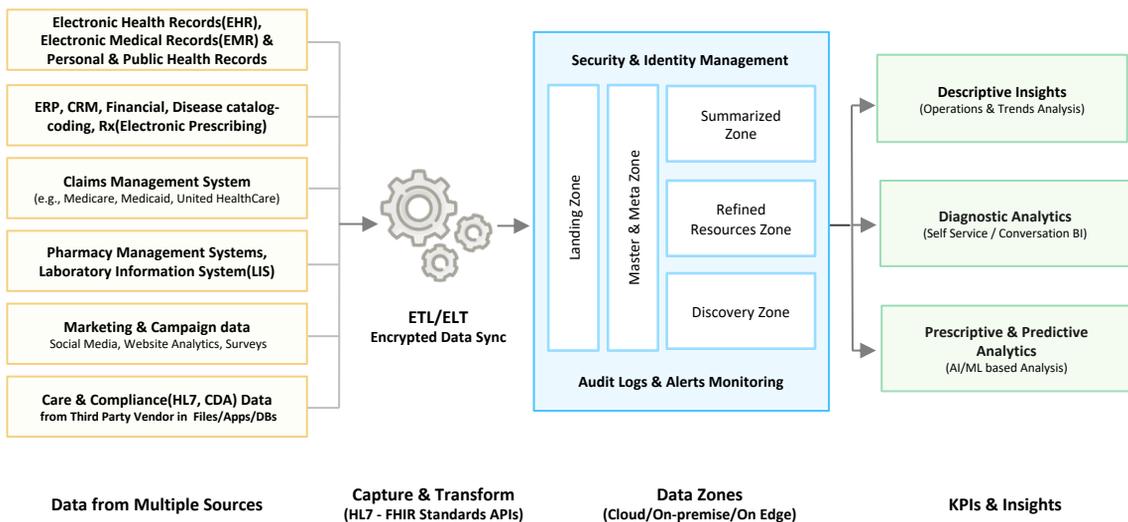

4 Improved staffing through health operation intellect and quickly identify revenue leakages and compliance issues.

5 Insight Intellect leverages AI/ML features like forecasting, text analysis, anomaly detection, and natural language processing with a Q&A based visaul/interface.

6 Covered all aspects of revenue management starting from preregistration, treatment, patient-payer follow-ups and collections.

HealthIntellect Solution Overview

Data Intellect collects data from various data sources considering patient journeys on different touchpoints in administrative & clinical applications.

Features

Data Intellect

Integrate data from various sources for clinical and operational decision support and deliver on the promise of value-based healthcare

Customization & Branding

The platform supports fully branded customizations and personalized dashboards for everyone in the healthcare value chain.

Affordable Advanced Analytics

Reduced cost of ownership. 100+ domain-wise KPIs in catalog to choose from and ready-to-use insights.

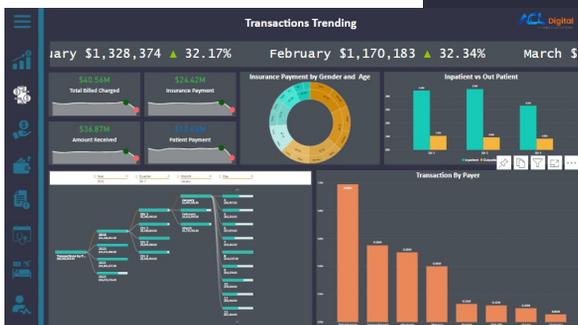

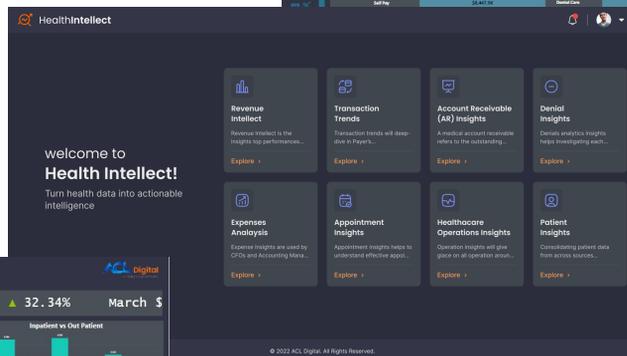

AI & ML Powered Intellect

The platform leverages off-the-shelf BI tools, AI & ML algorithms to enhance deep insights with modern charts and AI-enabled features.

Unified Health Experience

Connects and empowers consumers & population, providers, payers to manage health and wellness, augmented by accessible and supportive advanced analytics

ACL Digital Healthcare

ACL Digital's Healthcare Practice works with healthcare organizations to engineer personalized Total Experiences - anytime, anywhere, and on demand. Our design-led engineering services have provided secure, compliant, interoperable Digital Healthcare and Medical Device Engineering solutions accelerating digital innovation, driving business transformation, and enabling industry-wide convergence. With a "Digital First and Total Experience" philosophy, we are the partner of choice for global MedTech, Medical Devices/OEMs, and ISVs, in their Digital Healthcare, Omnichannel Patient Engagement, Virtual First care (V1C), Connected Medical Devices, and Digital Front door strategy implementation journey.

- By uniting analytics, compliance, UX, cloud, and interoperability, we offer unique, scalable Digital solutions that aim to enhance the quality, convenience, and personalization of care delivery.
- Leverages the triple trifecta (Cloud, Analytics, and UX for medical devices) to integrate data across disparate systems – from imaging to vitals to claims – helping cross-reference, match historical patient information, proactively identify illness, and engage with patients.
