

# SecureLine 2.0 your shield against Cyber Threats

Every organization needs robust security and SecureLine plays a critical role in achieving this.

In today's rapidly evolving, AI-driven digital landscape, ACL Digital is committed to safeguarding your organization's data and critical resources. Our advanced SecureLine platform—a comprehensive DevSecOps solution serves as the backbone of your security ecosystem, delivering Vulnerability Management as a Service (VMaaS) to proactively identify, prioritize, and remediate security risks.

## Secure Your Organization Today

With SecureLine, identify security vulnerabilities across every phase of the SDLC spanning application code, AI-driven systems, and cloud infrastructure. Achieve significant cost savings through efficient, scalable security assessments while enhancing software quality with comprehensive test coverage. Gain proactive, actionable insights through continuous security monitoring and incident reporting embedded throughout the SDLC

## Key Features

- 1 In-Depth Security Coverage**  
Enhance your software quality through extensive test coverage. Our framework ensures thorough testing at every stage of the SDLC covering Code - SAST, AI based applications, & API - DAST, Containers, Kubernetes, Cloud Infrastructure improving the overall security and resiliency of your applications.
- 2 Securing AI Apps**  
SecureLine secures Generative AI applications by proactively identifying risks such as prompt injection, excessive model autonomy, and data exfiltration attacks. It ensures sensitive information remains protected while enforcing robust guardrails across AI-driven workflows.
- 3 Incident Reporting & Alerting**  
Gain proactive, real-time insights through continuous security incident reporting across the SDLC. Monitor cloud environments and receive timely alerts on suspicious activities, security misconfigurations and spikes in costs.
- 4 Cost Optimization**  
Achieve unparalleled cost savings with our affordable security assessments. Our DevSecOps framework provides comprehensive security evaluations at a fraction of the traditional cost, optimizing your budget without compromising on quality.

2.0

# Industry Use Cases

DevSecOps is no longer optional and is the foundation for securing modern cloud, data, and AI-driven systems. DevSecOps is now widely adopted across industries to embed security into development pipelines, reduce risk, and accelerate delivery.

## AI & Data Platforms

Ensure workers wear helmets, vests, gloves, and masks. Reduce workplace injuries and legal liabilities.

## Banking & Financial Services

Ensure workers wear helmets, vests, gloves, and masks. Reduce workplace injuries and legal liabilities.

## Healthcare

Ensure workers wear helmets, vests, gloves, and masks. Reduce workplace injuries and legal liabilities.

## Retail and E-commerce

Ensure workers wear helmets, vests, gloves, and masks. Reduce workplace injuries and legal liabilities.

## Travel & Hospitality

Ensure workers wear helmets, vests, gloves, and masks. Reduce workplace injuries and legal liabilities.

## Why Choose ACL SecureLine?

Accelerate Secure Releases

Reduce vulnerabilities early in SDLC

Lower costs of vulnerability Management

Improve Visibility & Governance

Ensure Regulatory Compliance

ACL Digital is at the forefront of the Experience Portal Transformation service, helping organizations create digital workplace, customer self-service portals, Online Communities, Knowledge & Learning, meaningful eCommerce, and websites to engage customers, partners, employees, and suppliers.
