

# Corporate Brochure

ACL Digital, an ALTEN Group Company, is a trusted AI-led, Digital & Systems Engineering Partner delivering Chip-to-Cloud Solutions.

**Innovate ■ Digitize ■ Transform**

# About Us

ACL Digital helps clients design and build innovative products (AI, Cloud, and Mobile ready), content and commerce-driven platforms, and connected, converged digital experiences for the modern world through a design-led Digital Transformation framework. By integrating our strategic design, engineering, and industry capabilities, we help our clients decode the digital world and accelerate their growth journey.

Headquartered in Silicon Valley, ACL Digital is a trusted AI-led, Digital & Systems Engineering Partner delivering Chip-to-Cloud Solutions. We are a talented workforce and part of the 57000+ employee ALTEN Group, spread across more than 30 countries, offering a multicultural workplace and a collaborative knowledge environment.

# Recognitions & Certifications

# Business Values

Customer Focus

Passion and Commitment

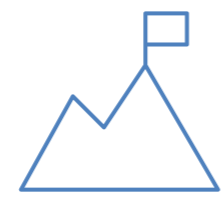

Transparency

Integrity

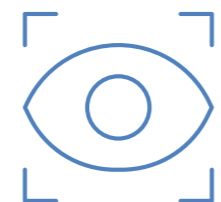

Innovative and Collaborative Culture

## Mission

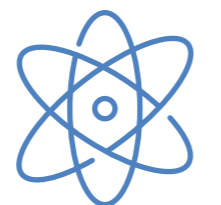

To innovate, digitize and transform to help our customers achieve better operational efficiency, enhance customer experiences and profitability.

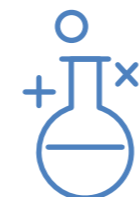

## Vision

To be the most innovative and preferred Product Innovation and Digital Transformation partner for enterprises while providing enhanced customer experience.

## Industries We Cater to

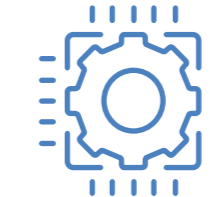

Healthcare & Life Sciences

Pharmaceutical

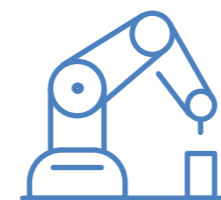

Communications

Semiconductor

Medical Devices

Manufacturing & CPG

Hi-Tech

Media and Entertainment

Industrial & Consumer Electronics

Travel, Transportation & Hospitality

Retail & E-Commerce

Energy & Utilities

Banking, Finance & Insurance

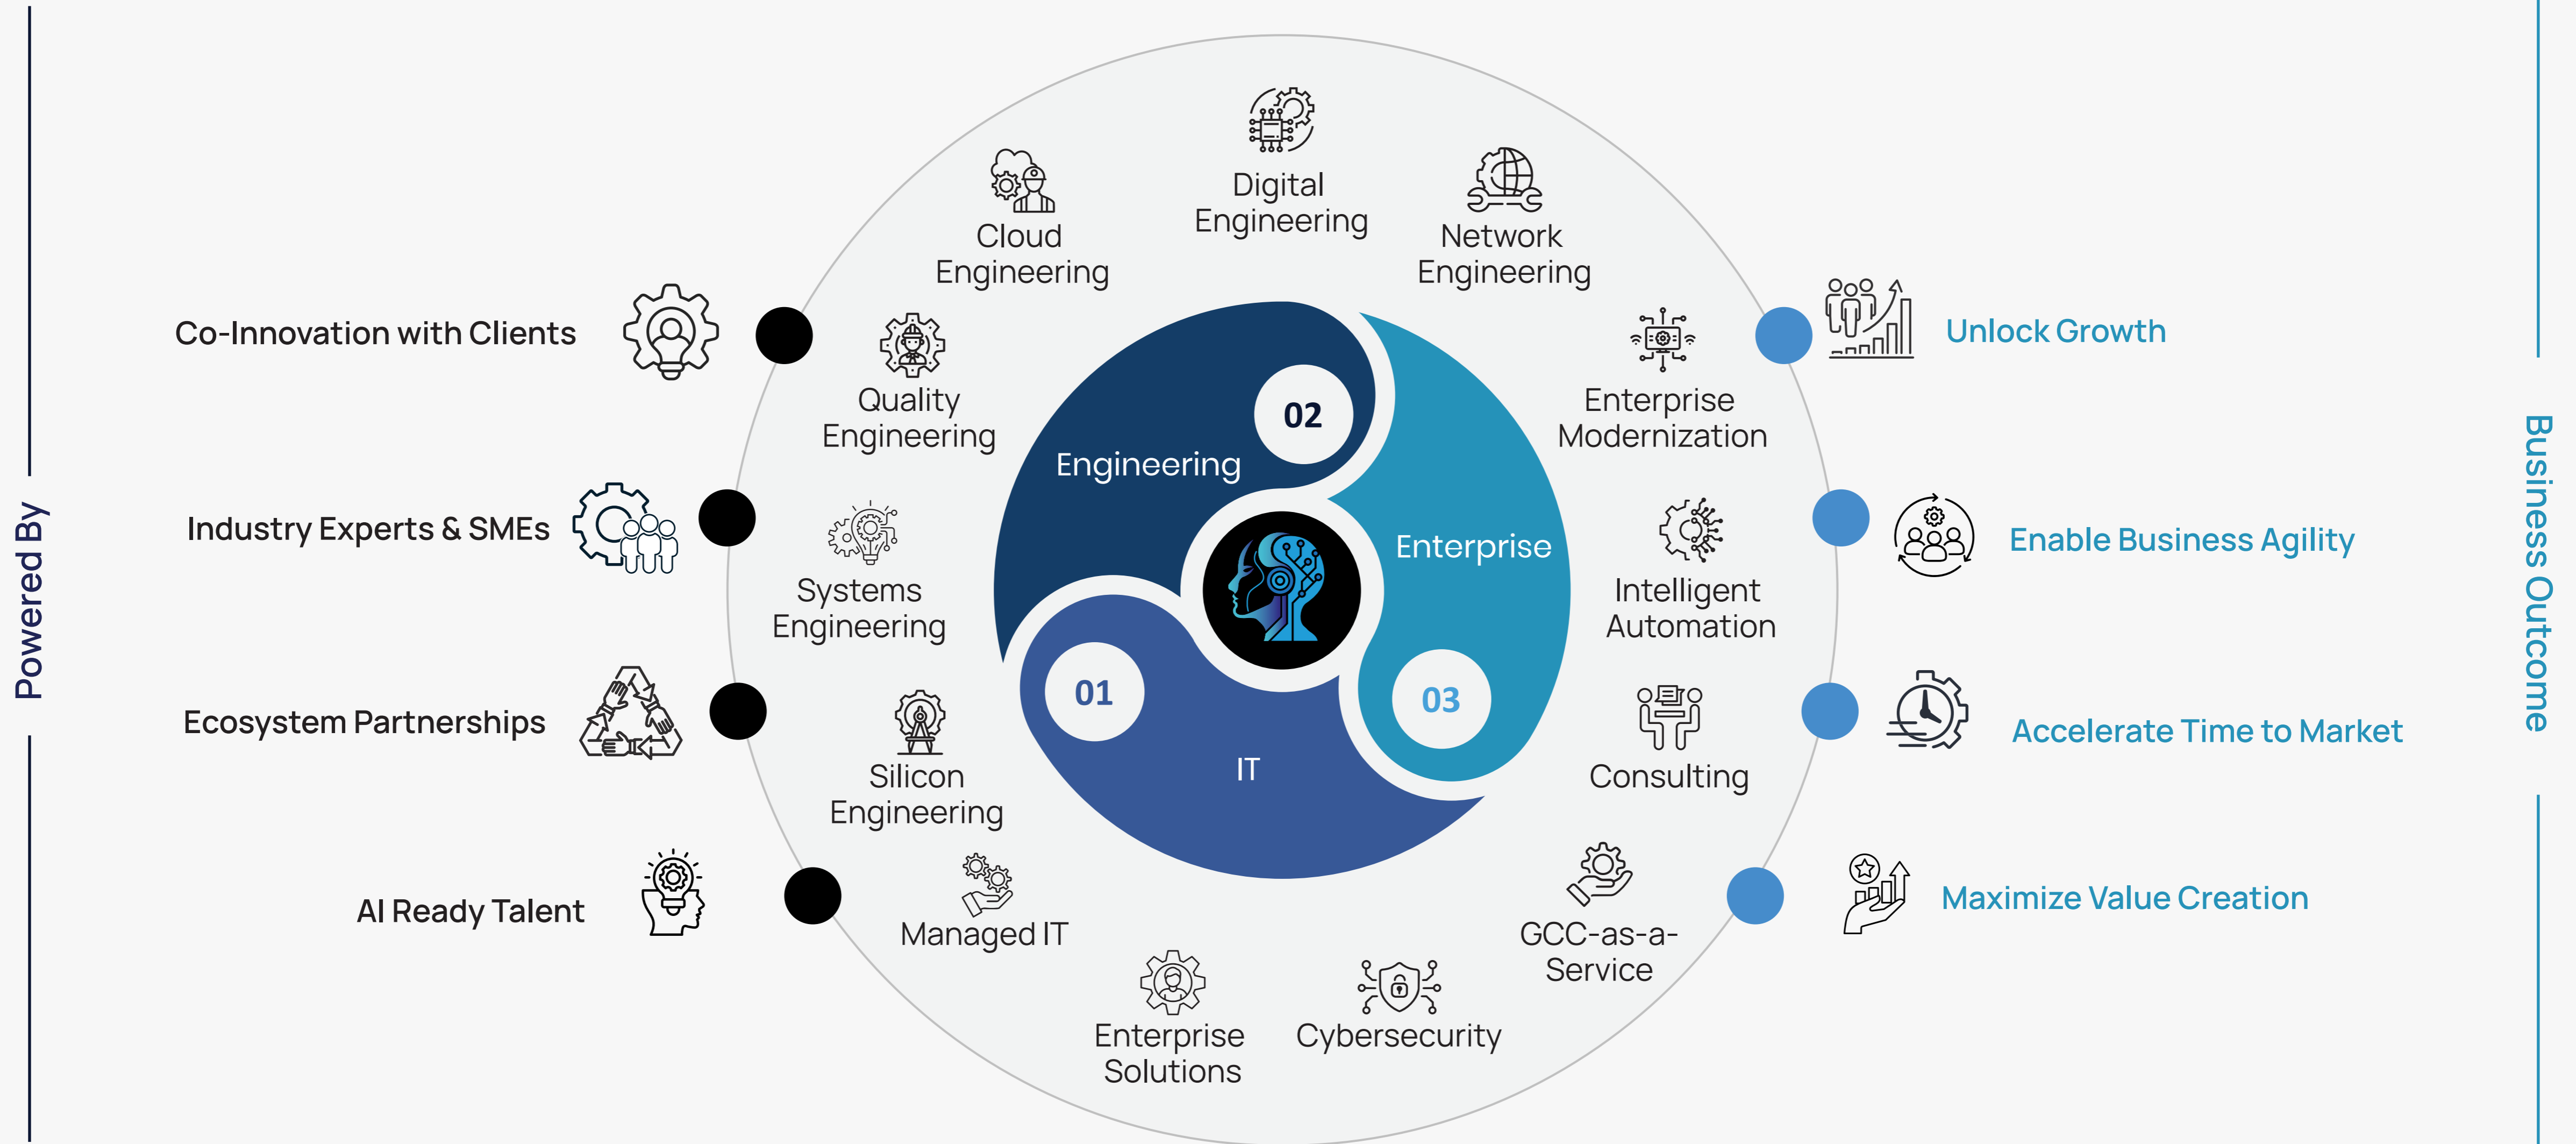

Automotive

Aerospace

# AI-Led Offerings to Deliver Real-world Solutions

Empowering enterprises with AI-driven systems and chip-to-cloud solutions.

# Leveraging AI-Led Accelerators

Amplifying customer business value

01

## Tessie

An intelligent STLC automation capability that bridges the gap between requirements and release. By analyzing PRDs and Jira stories, it generates comprehensive test artifacts including structured plans and executable API tests with minimal manual intervention. Featuring robust version control and human-in-the-loop validation.

02

## TalentSuite

Leverage AI-driven solutions to streamline hiring, skill mapping, and onboarding—enabling a smarter, faster, and more engaged workforce from day one through the entire employee lifecycle. Ensuring consistency, accuracy, and faster hiring decisions.

03

## BA Co-Pilot

A multi-modal Gen AI solution designed to overcome the slow, error-prone nature of manual requirement gathering and video analysis, it autonomously transforms informal inputs and Zoom walkthroughs into structured specifications and standardized test cases, ensuring precise traceability and accelerating release cycles by eliminating the documentation lag in complex cross-functional workflows.

04

## CLAYVEREST

An all-in-one PMO Copilot that seamlessly integrates with a customer's ecosystem to manage projects end-to-end roadmaps, risks, KPIs, actions and costs in a single pane of glass

05

## CogniSense

An AI-driven assistant that lets users ask plain-language questions over engineering, testing, sales, and other enterprise data, instantly generating analytics, charts, and actionable insights while understanding technical documents and knowledge bases to answer user queries and surface relevant information, bringing data analysis and knowledge retrieval into a single conversational experience.

06

## Embedded AI

An integrated Edge AI Suite for on- device AI development —combining GenAI, embedded AI, and predictive maintenance with 10+ tools, 50+ use cases, and 20+ expert resources to accelerate edge innovation at scale

07

## SemantixAI

A GenAI solution for internal assistant chatbots that replaces error-prone manual testing with automated precision. It streamlines the creation of diverse test scenarios and performs instant semantic analysis of chatbot responses to ensure accuracy and consistency.

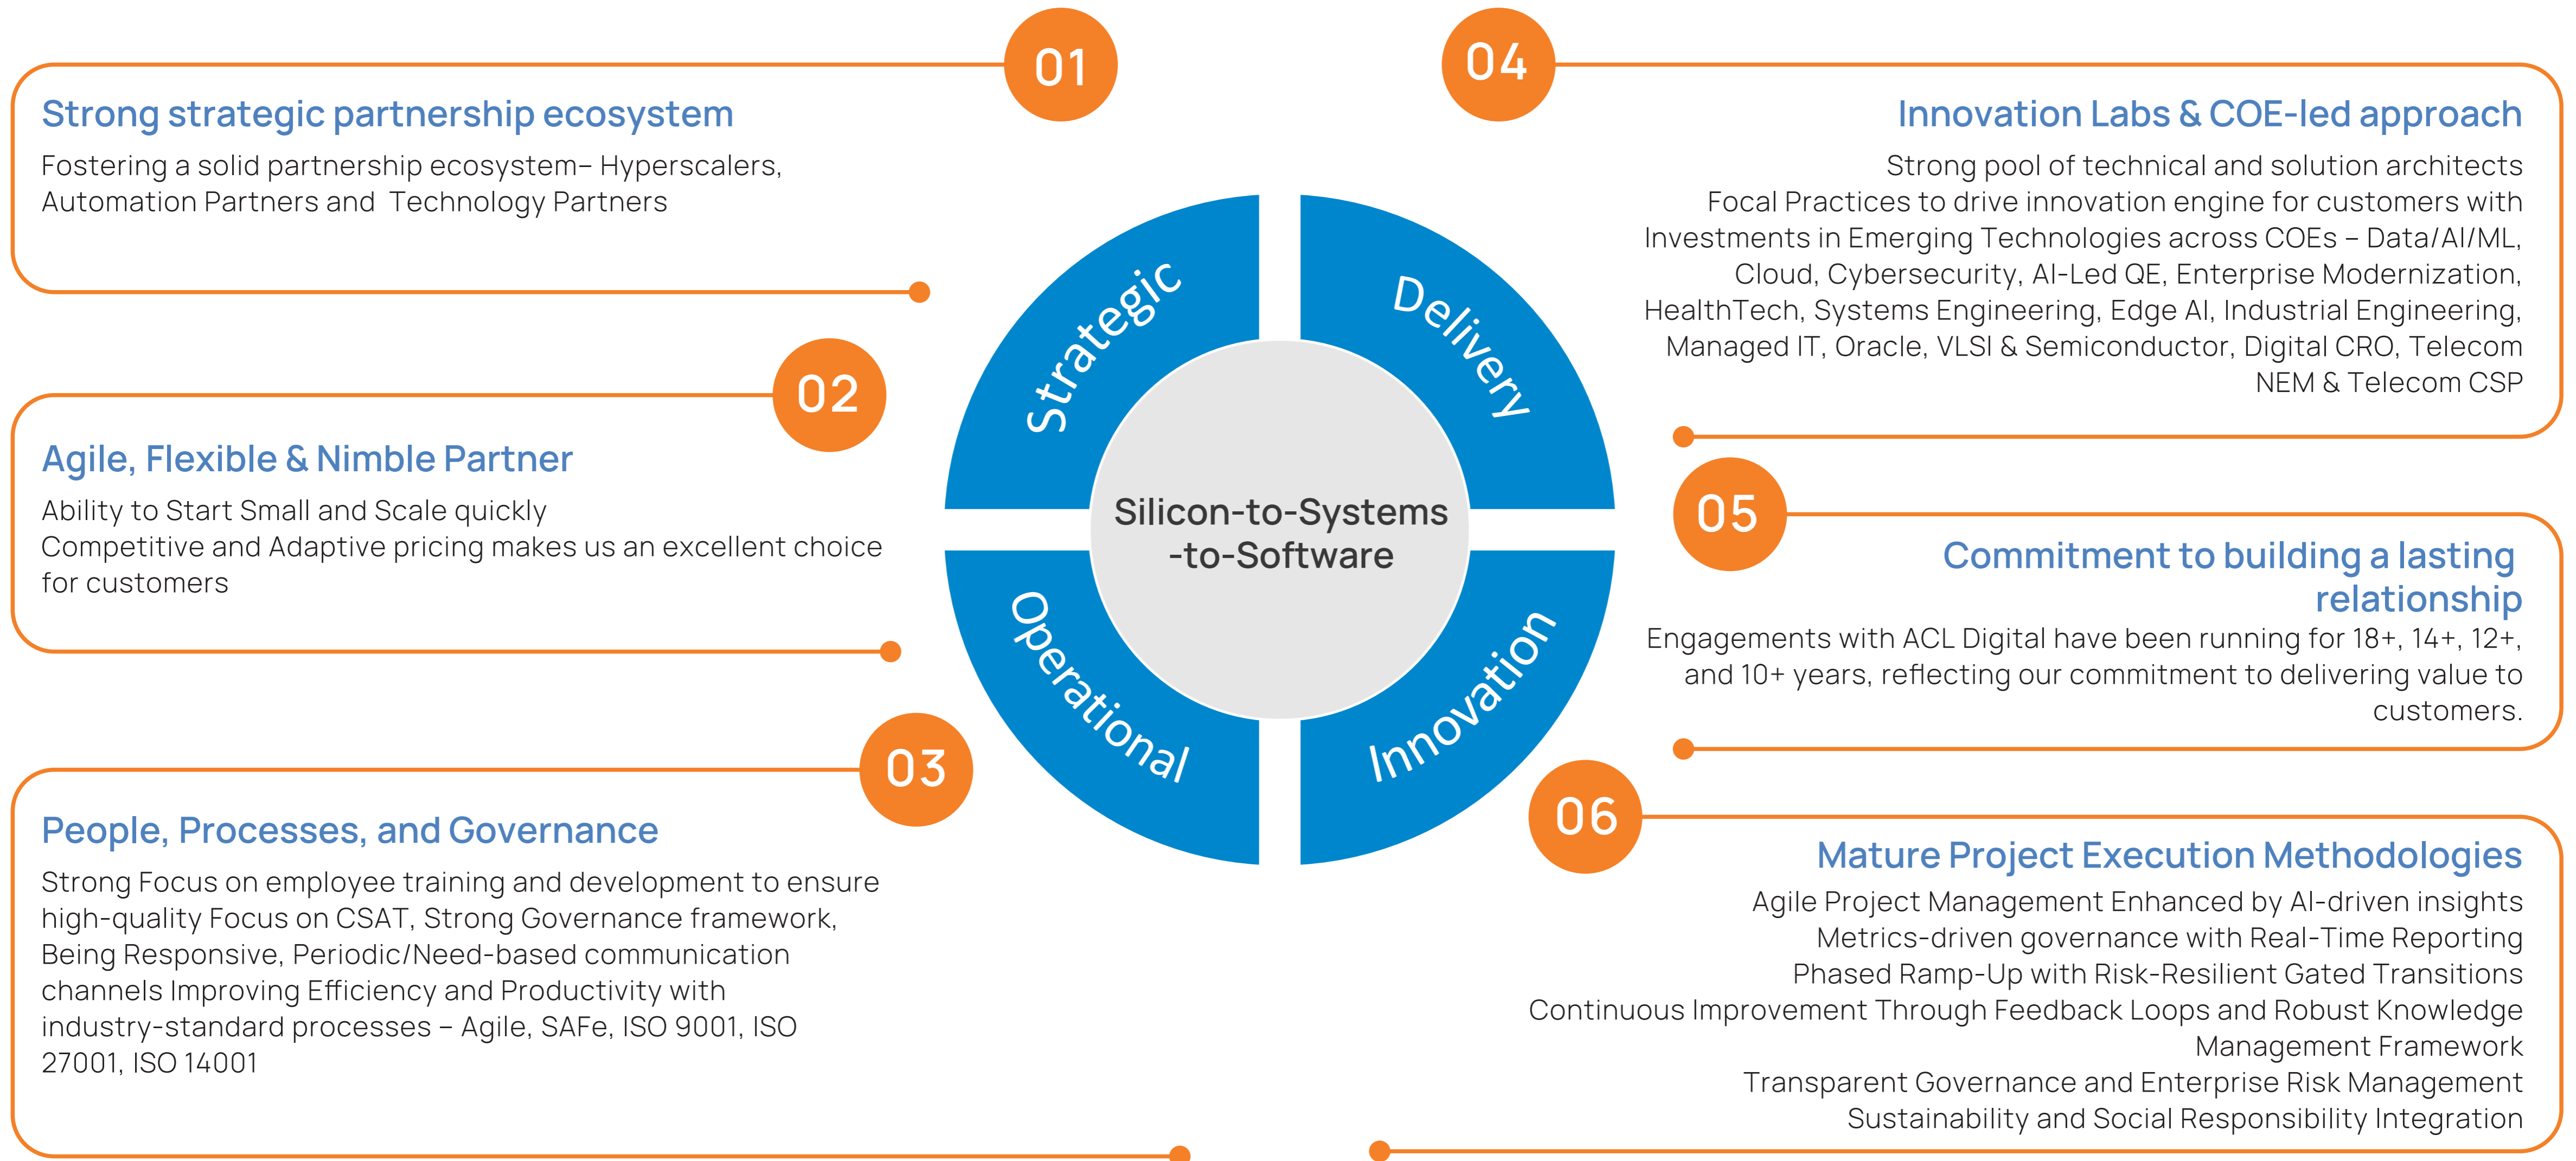

08

## SmartResolve AI

Automatically classifies user tickets and queries into predefined categories and delivers contextual, accurate responses by leveraging historical case data and client handbooks. Powered by GenAI and NLP, the solution significantly reduces manual effort and time spent handling repetitive inquiries.

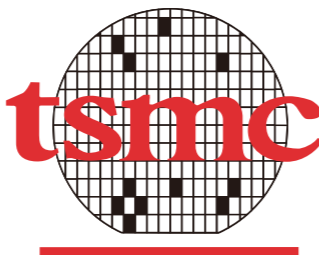

# Why ACL Digital?

Empowering Enterprises to lead in an AI-Driven world

# Building Strong Alliances

Creating collaborations for the AI-First economy

# Geo Presence
